***Economical • Easy to Use • Effective  
Global Experience • Swiss Quality***

## Overview Information of Using penergetic b and penergetic p for Crop Production

### *penergetic b*

#### Application Time

- in Spring (typically before planting) and/or in Fall (after harvest)
- can be mixed and applied with other crop inputs (subject to complying with mixing and use instructions for other product). Can also be field applied by mixing with granular fertilizer, added to liquid manure/slurry (when being agitated prior to field application) or combined with compost (when being field applied)

#### Application Rate

- for most field crops: 7.0 oz./acre. Higher rates for greater effect or special conditions \*

#### Product Forms/Size

- i) Liquid: 10 liters canister or 600 liter tote ii) Powder: 8.0 kg and 20.0 bags

### *penergetic p*

#### Application Time

- use as an in-crop foliar application alone or in combination with other crop inputs
- can be mixed and applied with other crop inputs (subject to complying with mixing and use instructions for other product).

#### Application Rate

- for most field crops: 3.5 oz./acre or greater. Different rates and/or additional application rates for specific crops. \* Can also be used as a seed dressing.

#### Product Forms/Size

- i) Liquid: 10 liters canister or 600 liter tote ii) Powder: 8.0 kg and 20 kg bags

\* For crop specific application rates refer to the Crop Application webpage on the website and/or consult with your Penergetic dealer.

Note: the "b" in penergetic b stands for "*boden*", the German word for soil and "p" in penergetic p stands for "*pflansen*", which is for the German word for plant].

Penergetic products are from Switzerland, have been in use for over twenty-five years and are used in over 45 countries around the world.
